

Cloud Hub

Where clouds connect™

Where is the best place for clouds to connect? Latency and bandwidth capacity are a key concern for you and your customers as they move their services into the cloud. Providing them with optimized network connectivity will allow you to increase performance, reliability and revenues. With maximum uptime, a ready-made cloud community, unprecedented connectivity and a dedicated support team, Interxion Cloud Hubs are the ideal environment.

Interxion Cloud Hubs

Located in state-of-the-art data centres in 13 of Europe's leading consumer and business hubs, Interxion Cloud Hubs provide the optimum environment for cost-effective development, launch and management of successful cloud-based services for enterprises, cloud service providers and system integrators. They also enable fast, easy interconnection within Europe's largest and fastest-growing cloud community. New markets can be reached quickly via a single, consistent SLA which automatically extends to every other Hub. All underpinned by 24x7 support from Interxion's unique, multi-lingual, single-point-of-contact European Customer Service Centre.

Better-connected

Across Europe, Interxion houses the broadest range of network providers and Internet exchanges of any data centre operator, with access to over 2,000 Internet Service Providers and most fibre networks. In the Cloud Hub you can leverage your location in a leading network hub to connect quickly, easily, and cost-effectively to both public and private cloud providers via a cross-connect or a switching platform.

Maximum uptime

The uptime in our Service Level Agreement is 99.999%. The Cloud Hubs are located in ultra-secure modern data centres with multilayered security including CCTV, mantraps, biometric scanning and 24-hour surveillance. All systems are built around resilience and independently assessed: each site has been independently assessed and accredited for ISO 27001, the international standard for data security, and Interxion is also accredited for the BS25999 international business continuity standard

Key benefits

Interxion offers Europe's highest concentration of cloud service providers, the most effective reach to the largest number of European end-users and the deepest understanding of the needs of cloud service providers and system integrators.

- Lower networking costs by peering traffic directly with key cloud delivery partners.
- Maximum bandwidth capacity.
- Reduce latency to end-users via Cloud Hub city centre locations.
- Broadest range of Carriers, ISPs, Content Distribution Networks, Internet and Ethernet Exchanges of any European data centre operator.
- Maximum uptime with industry-leading redundancy, resilience and security.
- Quick, easy cross-connects and private connections to end-users.
- Flexible, scalable space and power.
- In-house access to a thriving and growing cloud community.

Seamless scalability

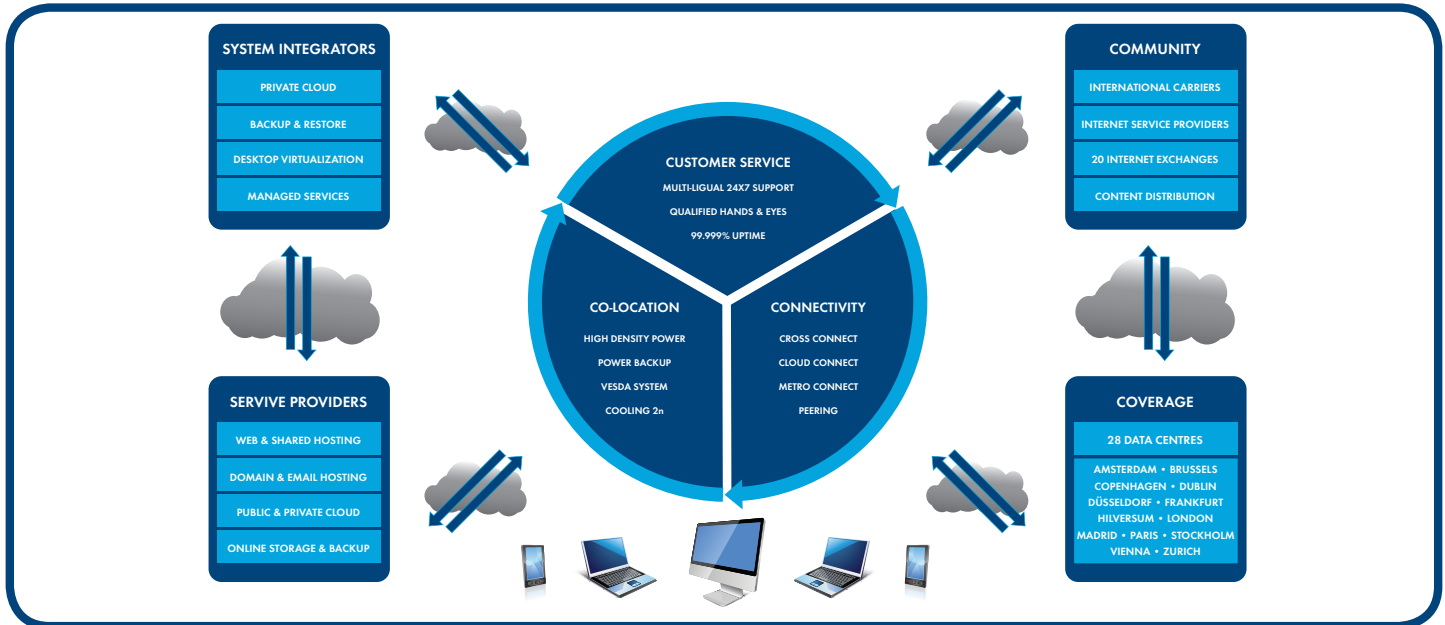

With 28 industry-leading data centres in 11 countries across Europe, Interxion is uniquely placed to support your growing requirements. High-density power configurations from 5 to 30 kVA per cabinet are available.

A ready-made community

Over 200 of Interxion's customers provide cloud-related services, and this number keeps on growing. Our cloud community includes hosters who operate server platforms and/or cloud services, ISPs that provide their end-users optimal connectivity to the cloud, SaaS providers who need connectivity to the cloud and enterprises who run their applications in the cloud. By connecting through Interxion Cloud Hubs, each member of our community can deliver the best possible services to end-users.
